The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more.

Distributed by the University of Nebraska Press for Lewis and Clark College Based on the world-class collection of expedition materials archived at Lewis & Clark College, this is the first comprehensive bibliography of publications about the Lewis and Clark expedition to be published in one hundred years. The Literature of the Lewis and Clark Expedition is divided into seven sections: the expedition's traveling library of scientific, technical, and cartographic materials (1754-1804); related congressional documents and early notices (1803-7); editions of Patrick Gass's journal (1807-1904); surreptitious accounts (1809-46); the Biddle-Allen narrative of the expedition and other edited editions (1814-2001); nineteenth-century publications (1803-1905); and twentieth-century publications (1906-2001). In each section introductory historical essays by Stephen Dow Beckham survey the large cast of characters who have contributed to the expedition story since the last years of the eighteenth century: legislators, scientists, explorers, journal writers, editors, publishers, printers, illustrators, cartographers, and collectors. The bibliographies for each section list all known publications related to the expedition, with fully annotated descriptions of primary texts. The book is lavishly illustrated with images from Lewis and Clark College's collection: title pages, contemporary engravings, maps, contemporary newspaper reports, and manuscript journals.

In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and un-reachability of

global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. Liquid Modernity concludes the analysis undertaken in Bauman's two previous books Globalization: The Human Consequences and In Search of Politics. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.
