Description – A Mention in Despatches was instituted during the Great War and continued to be awarded for active service up to August 10th, 1920. It was worn on the ribbon of the Victory Medal unless the victory Medal had not been issued in which case it was worn on the ribbon of the British War Medal and consisted of a Bronze spray of oak leaves. In August 1920, the emblem was altered to a single bronze oak-leave emblem, worn on the ribbon of the appropriate campaign medal, and in 1993 ...

To be mentioned in despatches can be a condition of receiving certain decorations. Though not a medal, for actions during WW1, soldiers were entitled to receive a certificate and wear a decoration of a spray of oak leaves in bronze (instigated in an Army Order on 12 January 1920), which could be displayed on the Victory Medal.

Prior to "the Great War" it had long been the custom to "mention" in official reports and dispatches from the battlefield the names those officers and men who had especially distinguished themselves in the campaign or an action. Generally speaking – especially prior to the mid 19C – it was mainly officers who were "mentioned" and there was no visible indication of the fact, apart from a reference in the officer's "War Services" and in his official record; similarly ...

I initially thought this was "mentioned in despatches," but I don't think this is correct, as another soldier from his unit was mentioned in despatches and received an award. My friend's GF did not. The other fellow's B103 record stated: "Mentioned in General Munroe's dispatches [sic] for distinguished services rendered in the M.E.F."

A feat of arms and gallantry probably unsurpassed in the glorious history of the British Army' was the description by the Chief of Defence Staff of the decisive victory at Goose Green in 1982 during the Falklands War. How true a picture does this statement give? Spencer Fitz-Gibbon's detailed examination explodes some of the myths surrounding the battle and the part played in it by Colonel H. Jones, V.C. The book explains how the system of tactical command known as 'restrictive control' nearly led to defeat rather than victory, and that it was the death of Colonel Jones and the resulting switch to the alternative 'directive command' style that enabled the British to win the day. This fascinating and important book - required reading for anyone with a serious interest in warfare, organisation studies, and management generally, as well as those concerned about history becomes distorted - shows how important lessons have been ignored as a result of inaccurate reporting and unquestioning glorification of the British performance. The Author: Spencer Fitz-Gibbon's book grew out of his Ph.D. thesis 'Tactics, Command and Military Culture: A Study of 2 Para at Darwin-Goose Green'. He has published many articles on military theory and tactics.

"The best book to have been written about the Vietnam War" (The New York Times Book Review); an instant classic straight from the front lines. From its terrifying opening pages to its final eloquent words, Dispatches makes us see, in unforgettable and unflinching detail, the chaos and fervor of the war and the surreal insanity of life in that singular combat zone. Michael Herr's unsparing, unorthodox retellings of the day-to-day events in Vietnam take on the force of poetry, rendering clarity from one of the most incomprehensible and nightmarish events of our time. Dispatches is among the most blistering and compassionate accounts of war in our literature.

Officers led and men followed; all were expected to do their duty without thought of reward. Enlisted men rarely penetrated the officer ranks and promotion owed more to money than merit. Then came the Crimean War.The incompetence and ineffectiveness of the senior officers contrasted sharply with the bravery of the lower ranks. Fuelled by the reports from the first-ever war correspondents which were read by an increasingly literate public, the mumblings of discontent rapidly grew into a national outcry. Questions were asked in Parliament, answers were demanded by the press why were the heroes of the Alma, Inkerman and the Charge of the Light Brigade not being recognised? Something had be done.That something was the introduction of an award that would be of such prestige it would be sought by all men from the private to the Field Marshal. It would be the highest possible award for valour in the face of the enemy and it bore the name of the Queen for whom the men fought.This is the story of how the first Victoria Crosses were attained in the heat of the most deadly conflict of the nineteenth century. It is also an examination of how the definition of courage, as recognised by the awarding of VCs, evolved, from saving the regimental colours at the Alma to saving a comrade in the No Mans Land before Sevastopol.

Although the United States itself did not enter the war until April 1917, Canada enlisted the moment Great Britain engaged in the conflict in August of 1914. The Canadian contribution was great, as over 600,000 men and women came to serve in the war effort. Over 150,000 were wounded while near 67,000 gave their lives. The literature it generated, and continues to generate so many years later, is enormous and addresses all of its aspects. The Canadian Experience of the Great War: A Guide to Memoirs is the first attempt to identify all of the published accounts by Canadian veterans of their Great War experiences.

Adrian Holloway was only seventeen when he left the Royal Naval College at Dartmouth in 1940 and joined HMS Valiant as a Midshipman, sharing a gunroom with Midshipmen Terry Lewin and HRH Prince Philip. He arrived in the Mediterranean in time to witness the darkest days of the Mediterranean Fleet – providing cover for the Fleet Air Arm's raid on Taranto, fighting at the Battle of Matapan and taking part in the evacuation of Crete – during which time the Royal Navy's vessels were decimated. He also witnessed the sinking of HMS Barham, and after returning from an appointment to the Australian destroyer HMAS Nizam, was back on board Valiant when Italian frogmen mined her in Alexandria Harbour in 1941.In From Dartmouth to War Adrian Holloway presents a fascinating first-hand account of the war at sea, vividly recalling what it was like to be in battle whilst still little more than a schoolboy. He describes the transition from the safety of Dartmouth to the terror and confusion of the open ocean, at a time when Britain stood alone against the Axis. Complete with personal photographs, track charts and naval signals, this book provides an invaluable insight into the wartime activities of a junior officer.

A work of historical, comparative sociology examining the evolution of infantry tactics in the American, Australian Canadian, British, French, German, and Italian armies from the First World War to the present. It addresses a key question in the social sciences of how social solidarity (cohesion) is generated and sustained.
