Sixth mass extinction of wildlife accelerating, scientists ...

The Holocene extinction, otherwise referred to as the sixth mass extinction or Anthropocene extinction, is an ongoing extinction event of species during the present Holocene epoch (with the more recent time sometimes called Anthropocene) as a result of human activity. The included extinctions span numerous families of plants and animals, including mammals, birds, reptiles, amphibians, fishes ...

Holocene extinction - Wikipedia

According to a recent analysis, the sixth mass extinction of wildlife on Earth is accelerating. More than 500 species of land animals are on the brink of extinction and are likely to be lost within 20 years; the same number were lost over the whole of the last century. The scientists say that without the human destruction of nature, this rate of loss would have taken thousands of years and they warn that this may be a tipping point for the collapse of civilisation.

Sixth Mass Extinction of Wildlife Accelerating- Study ...

But whether this constitutes a sixth mass extinction depends on whether today's extinction rate is greater than the "normal" or "background" rate that occurs between mass extinctions. This background rate indicates how fast species would be expected to disappear in absence of human endeavour, and it's mostly measured using the fossil record to count how many species died out between mass extinction events.

Are We Really in a 6th Mass Extinction? Here's The Science

The sixth mass extinction, explained. February 17, 2019. David McNew/Getty Images. The populations of the world's wild animals have fallen by more than 50 percent and humanity is to blame. Here's ...

The sixth mass extinction, explained

The Sixth Mass Extinction, also known as the Sixth Extinction or the Holocene extinction event, is an ongoing extinction event perpetrated by human beings. It began about 50,000 years ago, when modern man first left Africa. Since then, it seems to have been nothing but havoc.

What is the Sixth Mass Extinction? (with pictures)

The ongoing sixth mass species extinction is the result of the destruction of component populations leading to eventual extirpation of entire species. Populations and species extinctions have severe implications for society through the degradation of ecosystem services.

The Sixth Extinction: An Unnatural History is a 2014 non-fiction book written by Elizabeth Kolbert and published by Henry Holt and Company. The book argues that the Earth is in the midst of a modern, man-made, sixth extinction. In the book, Kolbert chronicles previous mass extinction events, and compares them to the accelerated, widespread extinctions during our present time.
