Psychology is a relatively young science with its experimental roots in the 19th century, compared, for example, to human physiology, which dates much earlier. As mentioned, anyone interested in exploring issues related to the mind generally did so in a philosophical context prior to the 19th century. Two men, working in the 19th century, are generally credited as being the founders of psychology as a science and academic discipline that was distinct from philosophy.

### History of Psychology | Introduction to Psychology

History of Psychology (387 BC to Present) 387 BC Plato suggested that the brain is the mechanism of mental processes. 335 BC Aristotle suggested that the heart is the mechanism of mental processes. 1774 AD Franz Mesmer detailed his cure for some mental illness, originally called mesmerism and now known as hypnosis.

### History of Psychology | A Timeline | AllPsych

While psychology did not emerge as a separate discipline until the late 1800s, its earliest history can be traced back to the time of the early Greeks. During the 17th-century, the French philosopher Rene Descartes introduced the idea of dualism, which asserted that the mind and body were two entities that interact to form the human experience.

### Brief History of Modern Psychology - Verywell Mind

The term psychology was first encountered in philosophical books of the 16th century. It was formed from two Greek words ' Psyche ' (soul) and ' logos ' (doctrine). By soul, was meant the principle underlying all the phenomena of mental and spiritual life. The modern ideas about mind and its functioning were derived from Greek philosophy.

### History and Origin of Science of Psychology

The earliest psychologists that we know about are the Greek philosophers Plato (428–347 BC) and Aristotle (384–322 BC). These philosophers asked many of the same questions that today ' s psychologists ask; for instance, they questioned the distinction between nature and nurture and the existence of free will.
