A car ' s electrical system is a bit like your body ' s
circulatory system in that it has a battery (the heart) from
which electricity (blood) flows along the wires (the blood
vessels) to the parts that require it, before returning to the
battery. In fact, the analogy is closer still when you consider
that like blood, the electrical current flows in only one
direction – from the battery, to the part being powered and
back to the battery through the car ' s metal body.
