Edition Key

The basic unit of body structure is the cell.

Cells have the same basic structure.

Function, size, and shape may differ. Cells are very small. You need a microscope to see them. Cells need food, water, and oxygen to live and function. Figure 10-1 shows the cell and its structures. The cell membrane is the outer covering. It encloses the cell and helps hold the cell ' s shape.

Body Structure and Function

The structures involved include the nasal passage, the trachea, and the lungs. The respiratory system takes oxygen from the environment to be used throughout the body. In humans, oxygen is taken into the body by the lungs, where it and rapidly diffuses into the blood.
