Controversial Issues in Social Studies Education in Turkey: The Contemporary Debates consists of different research each analyze a controversial topic that is significant to understand the social and political dynamics of Turkish society and culture. One of the purpose of this volume is to analyze and discuss how various controversial issues are perceived by Turkish educators. It also provides insight about how to think and re-organize education both in Turkey and in a global world by taking perceptions of in-service and pre-service social studies teachers on controversial issues and how to teach about them in the Turkish context into consideration. Lastly, it may provide educators and researchers who are interested in teaching and examining such issues with a holistic view.

Science and technology are embedded in virtually every aspect of modern life. As a result, people face an increasing need to integrate information from science with their personal values and other considerations as they make important life decisions about medical care, the safety of foods, what to do about climate change, and many other issues. Communicating science effectively, however, is a complex task and an acquired skill. Moreover, the approaches to communicating science that will be most effective for specific audiences and circumstances are not obvious. Fortunately, there is an expanding science base from diverse disciplines that

can support science communicators in making these determinations. *Communicating Science Effectively* offers a research agenda for science communicators and researchers seeking to apply this research and fill gaps in knowledge about how to communicate effectively about science, focusing in particular on issues that are contentious in the public sphere. To inform this research agenda, this publication identifies important influences â €" psychological, economic, political, social, cultural, and media-related â €" on how science related to such issues is understood, perceived, and used.

This book contains up-dated versions of articles which proved very popular when first published in *Neurochemistry International*. The articles draw attention to developments in a specific field perhaps unfamiliar to the reader, collating observations from a wide area which seem to point in a new direction, giving the author's personal view on a controversial topic, or directing soundly based criticism at some widely held dogma or widely used technique in the neurosciences.
