HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the verybeginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

Emphasizes that in addition to skills, in order to succeed students must value education and be aware of its relevance to their lives.

A revised edition of the inspiring bestseller, now in paperback with new good rider profiles! This book is exactly what you need to become a better rider. It's a smart, honest, on-target kick-in-the-pants, guaranteed to rev your engines as you see how a few changes in your life, a few smart choices and strategic moves, can transform you from a run-of-the-mill rider into a good one. How does Denny Emerson know what makes a good rider? For one thing, he is one--he is the only rider in the world to have won both a gold medal in international eventing and a Tevis Cup buckle in endurance. Plus, he's been around great riders, and taught those on their way to becoming great, for over 40 years. How will what Denny knows help you become a good rider? He's boiled the whole thing down into seven broad "Areas of Choice" that determine whether you are a "gonnabe" or whether you'll be stuck in the "wannabe" category for decades. Examine how your choice of riding sport may or may not be the best for who you are and where you live. Find out how those frustrating hurdles known as "life circumstances" don't necessarily hold you back like you think they do. Learn how to build a strong support team by winning people to your cause and choosing the right teachers and mentors. Analyze your physical self (your body, how it is formed and how you care for it) and your intellectual self (your "horse smarts" and how you are adding to them or not) and apply the results to your "gonna-be-good" equation. Take a good hard look at your partner--your horse--and think critically about his ability to help you attain your riding goals. Discover the nine key character traits of successful riders and how you can learn to call each one of them your own. Along the way you'll read the stories of 23 of the world's top riders from different disciplines and sports--including dressage, reining, driving, show jumping, endurance, hunter/jumper, and eventing--and how they "got good" despite the same kinds of challenges and setbacks you face in your own day-to-day riding. You'll get an inside look at their path to success, as well as their very best tips for how to "make it" in the horse industry.

This book shows readers how to cultivate a mindset that embraces stress, and activate the brain's ability to learn from challenging experiences.

Online education continues to enjoy a rapid growth in today's world. Take the next step toward your future today!

Sliver award winner in Business Reference 2020 Axion Business Book Awards What makes a great idea? Where do great ideas come from? The highly practical lessons in HOW TO GET TO GREAT IDEAS are based on neuroscience, psychology, and behavioral economics. Written by the former Creative Director of OgilvyOne, Dave Birss, this book offers a brilliant new system for conceiving original and valuable ideas. It looks at how to frame the problem, how to push your thinking, how to sell the idea and build support for it, and how to inspire others to have great ideas. It proves that any organization - and any department within an organization - can become a fertile environment for ideas. Combining a practical research-based system with fascinating insights and inspiring and humorous writing, the book is also accompanied by the problem-solving system RIGHT THINKING. This is a tool that shows organizations a more effective way to generate more effective ideas and is based on the thinking in the book. This is available online and in person from the author.
