## Portfolio Theory Of Information Retrieval

Yeah, reviewing a books **portfolio theory of information retrieval** could mount up your near links listings. This is just one of the solutions for you to be successful. As understood, achievement does not recommend that you have extraordinary points.

Comprehending as well as understanding even more than further will give each success. next to, the proclamation as skillfully as

*(PDF) Portfolio Theory of Information Retrieval*

Inspired by the Modern Portfolio Theory, an economic theory dealing with investment in financial markets, we argue that ranking under uncertainty is not just about picking individual relevant documents, but about choosing the right combination of relevant documents.

relevance predictions of individual documents have uncertainty, and are dependent between each other.

*Portfolio theory of information retrieval / 10.1145 ...*

Portfolio Theory in IR (2) Weight  $w_i$  is similar to the discount factors that have been applied to IR evaluation in order to penalize late-retrieved relevant documents [Järvelin and Kekäläinen(2002)] It can be easily shown that when  $w_1 > w_2 \dots > w_n$ , the maximum value of  $R_n$  gives the ranking order  $r_1 > r_2 \dots > r_n$  This follows immediately that

maximizing  $R$  - by which the document with highest relevance score is retrieved first, the document with next highest is retrieved second, etc ...

## *Portfolio Theory of Information Retrieval*

In general, the process of retrieving information consists of two phases. In the first phase, probabilistic retrieval models [1] compute the relevance between a given user's information need (query) and each of the documents in a collection. The second phase focuses on how to rank the calculated documents; the classic Probability Ranking
