Pythagorean Theorem Worksheets

The Pythagorean Theorem relates to the three sides of a right triangle. It states that $c^2 = a^2 + b^2$, C is the side that is opposite the right angle which is referred to as the hypotenuse. A and b are the sides that are adjacent to the right angle. The theorem

Pythagorean Theorem Problems

The Pythagorean Theorem or Pythagoras' Theorem is a formula relating the lengths of the three sides of a right triangle. If we take the length of the hypotenuse to be c and the length of the legs to be a and b then this theorem tells us that: $c^2 = a^2 + b^2$. Pythagorean Theorem states that
