VW Car Radio Stereo Audio Wiring Diagram Autoradio ...

If your turn signals have stopped working, it'll be doing one of these things: blinking rapidly, coming on without blinking, or nothing at all. The good news is that all of these symptoms point to two possible issues, a bad turn signal relay or a dead bulb. If the signal blinks really fast, you have a bulb out on that side. If it doesn't come ...

How to Check and Replace a Turn Signal Flasher

I just purchased a 2006 Ram 1500 megacab with the 5.7 hemi. After about 2 days of driving, the right turn signal indicator started hyper-blinking, and had no right turn signals either front or rear. After about a hour driving, the left side did the same thing. So, I have NO turn signals functioning at all, the indicator hyper-blinks.

2006 turn signal problem | DODGE RAM FORUM

2006 Dodge Grand Caravan - Turn signal on driver side started blinking twice as fast as normal. This usually indicates a burned out bulb. Strange thing is that while the front drivers turn signal bulb is not burned out, it is only at about 1/4 of normal brightness. Driver side rear turn signal is at normal brightness.

2006 Dodge Grand Caravan - Turn signal on driver side ...

Remember that the rear should only have 2 wires on each side since the rear signals do not have running light feature. That means that you will find 1 wire for ground and 1 wire for signal pulse. The signal pulse wire should be the same color as the fronts so check and compare your wiring and note which color this is.
