The United States Social Security Administration (SSA) administers two disability programs: Social Security Disability Insurance (SSDI), for disabled individuals, and their dependent family members, who have worked and contributed to the Social Security trust funds, and Supplemental Security Income (SSSI), which is a means-tested program based on income and financial assets for adults aged 65 years or older and disabled adults and children. Both programs require that claimants have a disability and meet specific medical criteria in order to qualify for benefits. SSA establishes the presence of a medically-determined impairment in individuals with mental disorders other than intellectual disability through the use of standard diagnostic criteria, which include symptoms and signs. These impairments are established largely on reports of signs and symptoms of impairment and functional limitation. Psychological Testing in the Service of Disability Determination considers the use of psychological tests in evaluating disability claims submitted to the SSA. This report critically reviews selected psychological tests, including symptom validity tests, that could contribute to SSA disability determinations. The report discusses the possible uses of such tests and their contribution to disability determinations. Psychological Testing in the Service of Disability Determination discusses testing norms, qualifications for administration of tests, administration of tests, and reporting results. The recommendations of this report will help SSA improve the consistency and accuracy of disability determination in certain cases.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Abstract: The superconducting magnet of Central Solenoid (CS) model coil of China Fusion Engineering Test Reactor (CFETR) is made of Nb3 Sn/NbTi cable-in-conduit conductor (CICC), and operated by forced-flow cooling with a large amount of supercritical helium. The cryogenic circulation pump is analyzed and considered to be effective in achieving the supercritical helium (SHe) circulation for the forced-flow cooled (FFC) CICC magnet. A distributed system will be constructed for cooling the CFETR CS model coil. This paper presents the design of FFC process for the CFETR CS model coil. The equipment configuration, quench protection in the magnet and the process control are presented.

The High Call of Forgiveness exposes the strategy of the enemy that has caused too many of us to become trapped in a state of unforgiveness. From the pages of this book, you will learn the strategies of the enemy of your soul. By knowing the mode of operation of your opponent, you will become well equipped to fight him with intelligence. You will also learn that offense is a direct attempt by Satan to block the answer to the powerful prayer that Jesus prayed for us in John 17, that we may be one! Knowledge is power. By knowing this, you will learn to position yourself against the attack of the enemy. Rosemarie Downer takes you on an eye-opening and honest journey of self-examination. You will ask yourself and find answers to questions like these: What got me here? How can I get unstuck? How is it that I know what the Word of God say about unforgiveness, yet I find it so difficult to obey? The High Call of Forgiveness addresses: Why most people find it difficult to forgive The role of emotional hunger and emotional wounds in hindering us from forgiving others The importance of obtaining emotional healing The blessings associated with forgiveness The hand of God in our lives, even when others hurt us
