A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Explains how to maintain or enhance systems running the Linux operating system

This popular Build-It-Yourself (BIY) PC book covers every step in building one's own system: planning and picking out the right components, step-by-step assembly instructions, and an insightful discussion of why someone would want to do it in the first place.

Pentium Processor System Architecture describes the hardware architecture of computers using Intel's family of Pentium processors, providing a clear, concise explanation of the microprocessor's relationship to the rest of the system. Written for computer hardware and software engineers, this book details Intel's technical strategy behind the Pentium family of processors - not just how Intel designed Pentium, but why. This revised edition expands coverage of virtually every topic and adds new sections on the Pentium 90 and 100MHz (P54C) processors. In addition to pointing out the key differences between 80486 and Pentium system designs, the book explores all the important Pentium features.
