"This book provides insight into the latest findings concerning data warehousing, data mining, and their applications in everyday human activities"--Provided by publisher.

This book presents the first comparative review of the state of the art and the best current practices of data warehouses. It covers source and data integration, multidimensional aggregation, query optimization, metadata management, quality assessment, and design optimization. A conceptual framework is presented by which the architecture and quality of a data warehouse can be assessed and improved using enriched metadata management combined with advanced techniques from databases, business modeling, and artificial intelligence.

"This book provides an insight into important research and technological problems, solutions, and development trends in the field of data warehousing and OLAP. It also serves as an up-to-date bibliography of published works for anyone interested in cutting-edge DW and OLAP issues"--Provided by publisher.

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

This book constitutes the thoroughly refereed proceedings of the 19th East European Conference on Advances in Databases and Information Systems, ADBIS 2015, held in Poitiers, France, in September 2015. The 31 full papers and 18 short papers presented were carefully selected and reviewed from 135 submissions. The papers are organized in topical sections such as database theory and access methods; user requirements and database evolution; multidimensional modeling and OLAP; ETL; transformation, extraction and archiving; modeling and ontologies; time series processing; performance and tuning; advanced query processing; approximation and skyline; confidentiality and trust.

The climate crisis and the COVID-19 pandemic remind us that we cannot face down our challenges alone!our solutions must be global. The European Investment Bank is at the heart of the push to turn EU policy initiatives into real development solutions on the ground. This report provides insights into our vital projects and initiatives outside the European Union, data on their impact and ideas for the future of development through a series of expert essays.

Multinational corporations have developed networks of production that stretch across the globe. They have done this in order to maximize their ability to service their customers in markets worldwide, exploit greater opportunities for growth, maximize their profitability and increase their business value. It is the strength and quality of the relationships and connections that we build with other players that will ultimately determine the effectiveness and the success of our business. International Supply Chain Relationships looks at these complex connections, covering long-term inter-organizational relationships, situational inter-organizational relationships, multi-disciplinary global engineering teams, technologies and innovations, supply chain communication, supply chain coordination, and future trends. International Supply Chain Relationships aims to provide supply chain practitioners in any type of business with ideas, tools and strategies that they can readily access, interpret and put into practice speedily and pragmatically to create value for their own international business. In many instances, supply chain projects bring together people from different disciplines who may come from different cultures and ethnic backgrounds. Add in long distances and different time zones and the complexities and challenges of sustaining successful working relationships increase even more. This book provides case studies which illustrate how to manage these arrangements effectively.

This book gathers selected high-quality research papers presented at Arab Conference for Emerging Technologies 2020 organized virtually in Cairo during 21-3 June 2020. This book emphasizes the role and recent developments in the field of emerging technologies and artificial intelligence, and related technologies with a special focus on sustainable development in the Arab world. The book targets high-quality scientific research papers with applications, including theory, practical, prototypes, new ideas, case studies and surveys which cover machine learning applications in data science.
